🔐 Building a Cybersecurity Threat Detection Pipeline on AWS — From Raw Logs to Real-Time Predictions
In an era where cyber threats evolve faster than rule-based systems can handle, I built an end-to-end ML pipeline on AWS that ingests raw network logs, trains a classification model, and delivers real-time threat predictions through a live API endpoint.... ... more

I'm excited to announce that our team secured victory at the Relay Hack X Aqore hackathon hosted at Techspire College! Working alongside my talented teammates **Shuvam Khanal** and **Safal Lohani**, we tackled the Staffing Software Innovation Challenge – diving into a domain that's widely adopted globally but still emerging in Nepal. Our subsystem focused on Candidate Screening & Shortlisting, addressing a critical pain point in the staffing lifecycle by building a database-drive... more

Proud to have won the very first hackathon I participated in. It was a challenging and enriching experience that taught me far more than just technical skills. Along the way, I also became aware of my shortcoming while translating ideas into execution, which gave me clear areas to improve. Sincere thanks to **Techspire College** and **Aqore Nepal** for this wonderful opportunity.
